**8.7 million** people have been reached with health assistance out of 12.3 million people targeted. Over 22 million people live in 192 districts prioritized for cholera response. The provision of health assistance continues to be challenged by the fact that only 50 per cent of health facilities are fully functional and the non-payments of salaries to health staff.

### NUMBER OF BENEFICIARIES REACHED

### NUMBER OF BENEFICIARIES BY MONTH (in millions)

### ACHIEVEMENTS BY INDICATOR

response indicator annual target

**174K**  
Deliveries attended by a skilled birth attendant (doctor, nurse or midwife)
